Telecommunications Engineer - UNEFA - Venezuela - Completed 2012

Cloud Engineer | Network Automation Specialist

Telecommunications Engineer with over 10 years of experience leading the design, deployment, and optimization of critical infrastructure in large-scale corporate environments. With a strong background in network engineering and server administration, my current focus is on the convergence of robust infrastructure and agility through automation.

I have a proven track record of managing multi-vendor architectures (Cisco, Huawei, Fortinet, Extreme) and leading the transition to software-defined networking (SDN) using Cisco Catalyst Center. I specialize in creating automation solutions with Python and Bash, focused on vulnerability remediation and operational efficiency in L2/L3 environments. I have comprehensive experience in hybrid ecosystems (Windows/Linux), proactive monitoring with Zabbix, and deploying solutions on AWS/Azure. I am a professional focused on high availability and perimeter security, with a proven ability to execute strategic projects using agile methodologies.

CERTIFICATIONS:

- AWS Cloud Practitioner (Amazon Web Service). ID: 6S29YEPC9N4QQK3H
- AWS Solution Architect Associate (Amazon Web Service). ID: 6J4SW81CR2QQ1ZKF
- Microsoft Certified: Azure Fundamentals (AZ 900). ID: DB559082B6D70600
- Scrum Master Professional Certificate (Certiprof). ID: TLHZSHHQHV-TMTPSYSW-RHSLFHTFJR

PROJECTS AND PERFORMANCE

- Development of internal tools in Python (Netmiko / Pandas) for mass configuration, auditing, and automatic remediation of vulnerabilities in +1000 network nodes. Results: 30% reduction in response times and a 25% improvement in compliance in the first year.
- Creation of quick configuration scripts for Cisco IOS-X, NX-OS, Extreme, and Huawei platforms using Python, reducing human errors by 40%. Results: improved service quality and reduced resolution times. For Cisco IOS-X, NX-OS, Extreme y Huawei, reducing human fails to 40%.
- Reduction of critical network incidents on campus through standardization and continuous improvement.
- Leadership in the massive upgrade of 400 Cisco Series 9000 switches using Cisco Catalyst Center, reducing technological obsolescence and ensuring the security of the regional network park, increasing from 14% to 60%.
- Server administration in Windows and Linux environments; Active Directory and domain services and roles; Windows Security Updates Service; FileSystem; NAS; Zabbix; Linio Latam (Mexico, Colombia, Peru, Chile, and Argentina).
- Administration and monitoring PBX Telephony System Contact Center Linio Latam (México, Colombia, Perú, Chile y Argentina).
- Administration Database Service (MySQL), quality records, backups and restore, sync servers high availability of Servers On-Premise PBX Asterisk.
- Implementation, monitoring and participation of regional Linio Latam projects in synergy with Grupo Falabella policies.
- Migration of critical telephony infrastructure from On-Premise to Genesys Cloud, ensuring business continuity in 5 countries (Call traffic, flows, and IVRs).
- Implementation of Zabbix for monitoring Linio LATAM IT infrastructure.
- Virtualization of MySQL Server for replication of information and Call Center metrics.

- Virtualization of Linux Server for storage of Backup and information of expenses, email accounts.

TECHNICAL SKILLS

- Networking: Cisco, Huawei, Extreme, Fortinet, VLANs, STP, SNMP, OSPF, BGP, Routing. Cisco Catalyst Center, Wireless.
- Automation: Python, netmiko, pandas, requests. bash scripting.
- Windows Server, Linux, Active Directory.
- Cloud: AWS, Azure.
- IaC: Terraform and basic Cloud Formation.
- Management: Scrum, ITSM, Project Management, Jira
- Office 365
- Monitoring: Zabbix, Wireshark.
- Excel Intermediate, Power BI basic.
- Databases MySQL
- Telephony: Asterisk, Genesys Cloud.
- Version control: Git.

WORK EXPERIENCE

NetSecOps Analyst - Falabella Tecnología Corporativa / Grupo Falabella - august 2024 - may 2026

- Management and execution +5 regional networking and security projects on corporate campus, improving deployment speed by 15% across Colombia, Chile and Peru.
- Leadership and execution the mass migration and upgrade of 400 Cisco Catalyst 9000 Series switches using Cisco Catalyst Center, increasing regional compliance from 14% to 60%.
- Decommissioning and secure replacement of legacy systems (such as Cisco Prime) due to latent vulnerabilities.
- Automation of repetitive network tasks using Python scripts and consumption of the Netbox API, reducing provisioning times.
- Level 2 support for LAN, WLAN, and WAN networks in Cisco, Huawei, and Extreme environments.
- Development of Python scripts for automating compliance tasks, vulnerability remediation, and bulk configuration.
- Continuous improvement of network stability through incident analysis and process optimization.
- Technical coordination with infrastructure, vendor, and security teams at the regional level (Argentina, Chile, Peru, Colombia).

IT Specialist / Platform Engineer - Linio Colombia / Falabella.com - september 2019 - august 2024

- Administration and L2/L3 support for a hybrid platform of Windows Server (Active Directory, GPO, WSUS) and Linux (Ubuntu, CentOS) servers for over 500 users, maintaining 99.9% uptime.
- Critical migration of on-premise telephony (Asterisk) to Genesys Cloud, ensuring continuity across 5 countries (flows, IVRs, and call traffic).
- Centralized telephone system administration (Genesys Cloud, Asterisk) for the entire region, with 99.3% availability
- Administration of perimeter security through Firewalls and Site-Site / SSL VPN tunnels (Fortinet, Sophos, pfSense).
- Office 365 management (Licensing, Groups, Sharepoint permissions).
- Management Zabbix, successfully implementing proactive monitoring (alerts and metrics) for the region's infrastructure Linio LATAM.
- Project Management of IT Infraestructure. Zabbix implementation, migration from asterisk to Genesys Cloud. Server and services virtualization using Hyper-V and Proxmox.

IT Supervisor - Linio Venezuela - august 2016 – september 2019

- Windows Server (Active Directory, GPO, WSUS) y Linux (Ubuntu Server, CentOS) management for over 500 users, maintaining 99.9% uptime.
- Management of the solution's PBX Telephony (Asterisk) and database (MySQL)
- Firewall and VPN Site-Site / VPN SSL management (Fortinet, Sophos, pfSense)
- Office 365 management (Licensing, Groups, Sharepoint permissions)
- Implementation and management of zabbix for Linio Venezuela infrastructure.
- Performance analysis of infrastructure with wireshark, logs review and zabbix. Definition and documentation of IT administration processes and policies.
